SUPPORT

JCAHO Accreditation

If you are preparing for the accreditation process or maintaining your accreditation, we are committed to helping you prepare all of the necessary materials and equipment-related support to ensure compliance.

Inspection & Certification

We inspect your equipment using state of the art biomedical and simulation test equipment. Each piece of equipment is tested to ensure it is electrically safe and fully functional.

We also train and certify your personnel on cleaning and reprocessing endoscopes.

On-site Facility Assistance

We deliver fast and efficient telephone and on-site support to ensure your facility stays up and running.

We also provide services to the facility infrastructure such as monitor and equipment installations and removal, as well as video cabling.

Equipment Management Programs

Our Equipment Management Programs provide you with personal attention, technical assistance and on-site response. Each program is designed according to your individual needs and goals for education, safety, and a cost-conscious approach to medical equipment management.

Endoscope, Medical Equipment, Wall Bracket and Cabinet Sales

We offer quality pre-owned and reconditioned endoscopes, medical ancillary devices and patient monitors. We also sell new endoscope wall brackets and security cabinets for your valuable endoscopes.

We purchase or take your unwanted equipment on trade or consignment.

COMPLETEENDO CORP
BIOMEDICAL & EQUIPMENT SERVICES

Flexible Endoscope Repair & Service Contracts

From bending rubber and insertion tube replacements to CCD chip repairs, our excellent technical team can handle it all. Our Quality Repair System ensures consistent quality repairs returned in a timely manner.

We offer time and materials repair services as well as complete endoscope repair and facility support contracts. We provide a 39-point inspection and repair estimate for every instrument, and all repairs carry a 90-day parts and labor warranty.

Preventative Maintenance

Our training and preventative maintenance programs help your staff operate and maintain your equipment, reducing costly downtime and repair costs. Regularly scheduled preventative maintenance inspections locate and identify equipment failures prior to them becoming an issue with patient care.
